# WELCOME

## Fellow Beef Producers & Friends!

We at Milk Creek Reds would like to welcome you to our 20<sup>th</sup> annual production sale at the ranch. As you read in the papers and listen to the livestock markets, what a great time to be involved in the cattle industry with historical price levels in all segments of agriculture. With one of the lowest cattle inventories in decades, we should be set to see profitable margins within our industry for a few years. The low inventory has allowed us to see unprecedented demand for Red Angus females as well as Red Angus feeder calves. Rob Fraser, owner and manager of Miles City Livestock Commission, stated at the Red Angus Feeder Calf Sale in October 2010, "The highest priced bred females, and the highest priced feeder calves that sold at MLCC were Red Angus."

*Cele showing Sheba*

We at Milk Creek Reds are striving to produce the cattle that will work in our environment as well as any other environment. Over the past several years, we have been selecting sires that will moderate the frame without sacrificing performance. Hopefully as you look through our sale offering as well as our cow herd, moderation in frame and easy fleshing cattle is apparent and not just us giving lip service to what the industry is talking about. In the past year, the Red Angus Association teamed up with the American Simmental Association in order to produce EPD's that combined the two associations inventories that provide over 9 million records to give us more accurate EPD's to use in our selection process. This has provided the Red Angus Association to use the best science available to enable both the purebred and commercial operators to select cattle based on the values that are important to each individual operation. We hope that the information that we have available for you through the Red Angus Association as well as our own individual measurements that we take provide you with the tools to make the best selection of genetics for your operation.

As you look through the sale offering you will notice fewer bulls than in the past. This is due to a couple of different circumstances. First, we lost eight real nice bull calves that tested as carriers of Osteopetrosis. Secondly, in the spring of 2009 we had three late blizzards that caused our A.I. conception rate to be less than what we normally expect, thus we had less A.I. calves to select from. During the selection process the younger bull calves out of the clean up sires appeared to not have adequate weight to compete with the older calves, so thence they got banded. In retrospect, after they got weighed they would have had plenty of weight for their age. Even though we have been in the bull producing industry for 20 years we are still learning!

We are currently planning in late October of 2011 a registered female sale. We will be dispersing some age groups in their entirety, along with offering some commercial bred heifers.

We will have Dr. Beck with Fallon County Vet Service semen

evaluating the bulls the first week in March if the weather will permit. This information will be available sale day. The bulls are being fed at Bruce and Eric Bowman's one mile south of Rhame, ND. They will remain there until March 16th when we will bring them to the ranch. If you are near Rhame and would like to take a look at the bulls, just give us a call and we will let the Bowman's know that you are coming.

We continue to work with customers wanting to market females by putting buyers and sellers in contact with one another. Through the Red Angus Association we can also help to list cattle on their website. Once again, the Montana Red Angus Association worked with area sale barns and video auctions to host Red Angus feeder calf sales. We would be glad to assist you in marketing your Red Angus progeny.

Reflecting back on 20 years we have seen many changes in the cattle industry: frame size has decreased, weaning and yearling weights have increased due to genetics, ultra-sounding for pregnancy and sex, along with ultra-sounding for carcass data and many other significant steps of progress. The one thing that hasn't changed is the wonderful relationships with people that we have been able to develop through the Red Angus breed and the agriculture world. As the future of our ranch, we have already witnessed our daughters blossoming from acquaintances they have made through this breed, FFA, 4-H and agriculture. We truly enjoy the blessings that this life style called ranching has provided for us and our family.

*Jaclyn showing Dude*

*God Bless You,*

**MILK CREEK REDS - Bruce, Tena, Cele & Jaclyn Ketchum**

# SALE INFORMATION

**SALE DATE:** March 19, 2011  
Saturday at 1:00 p.m. MDST

*Complimentary lunch  
& pie will be served*

**SALE LOCATION:** At the Ranch - Plevna, MT

## ACCOMODATIONS:

Montana Motel - Baker, MT - (800) 779-8353  
Comfort Inn - Miles City, MT - (406) 234-3141

## PHONE:

(406) 778-3819 home or (406) 978-3819 cell

**PHONE ORDERS:** Buyers unable to attend the sale may call or send their bids to the owners, Bruce or Tena Ketchum. If you would like to discuss the sale offering, call us and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and you pay only the bid price established by the auction. Bids are handled in confidence on all orders.

**AUCTIONEER:** Scott Weishaar - 701.872.5299

**RED ANGUS ASSOCIATION DIRECTOR OF ADDED**

**VALUE PROGRAMS:** Myron Edelman - 307.351.6032

## SALE FORMAT:

Once again we will be offering the bulls through a rancher's auction. We will have an auctioneer that will auction the sale in a relaxed atmosphere. Each interested buyer will be able to bid on the bull of their choice with low pressure and the ability to be comfortable.

## TERMS:

The terms of the sale are cash. All settlements will be made with the clerks of the sale immediately following the conclusion of the sale and before any cattle will be released. We will follow the Terms and Conditions set forth by the Red Angus Association of America. Announcements made by seller on Sale Day take precedence over any statements in catalog or advertisement.

All sales are subject to an acceptable semen examination. Semen evaluation certificate will be furnished to the buyer. Each animal becomes the risk of the buyer (purchaser) as soon as sold.

## DELIVERY:

A \$50 credit per bull will be applied to the purchase price of the bull if the new owner picks up the bull(s) on the day of the sale. We will provide delivery up to 300 miles. Over 300 miles we will work with the buyer to make arrangements on delivery. Delivery of the bulls will start the week after the sale.

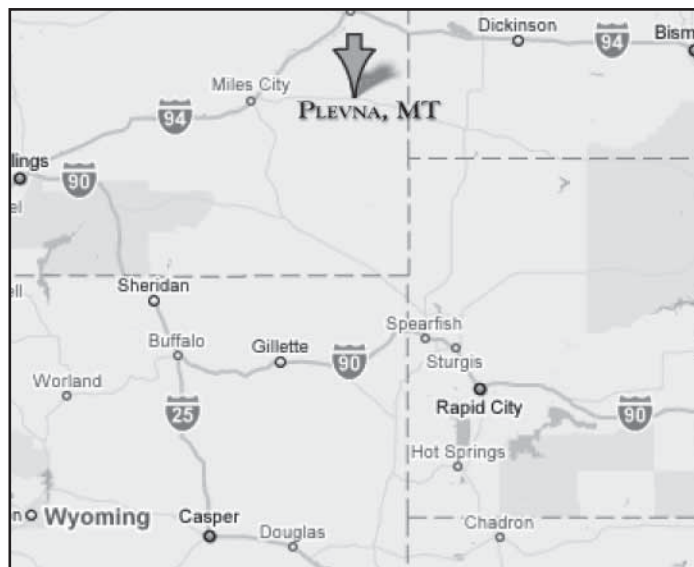

## HEALTH:

The bulls received Vision 7 at branding and then are preconditioned in September with Vision 7 Somnus, and Express 5 PHM. The bulls were poured with Ivomec in November and boosted with Bovishield FP5. In February they were poured with Ivomec and were administered Fusiguard foot rot vaccine. Semen evaluations are performed by Don Beck of the Fallon County Vet Service prior to the sale.

## BULL DEVELOPMENT:

The bulls are fed on a ration to develop them into sound functional useable bulls for big country. The bulls are fed to gain 2.5 lb per day. The ration consists of whole kernel corn (6.5 lbs), distiller's grain (1.5 lbs) and chopped grass/alfalfa hay. This ration is developed to use 1% of the feed base being grain to reach our goal of 2.5 lb gain. The bulls

# DIRECTIONS

## LIABILITY:

All persons who attend the sale do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents that occur on the sale or viewing premises.

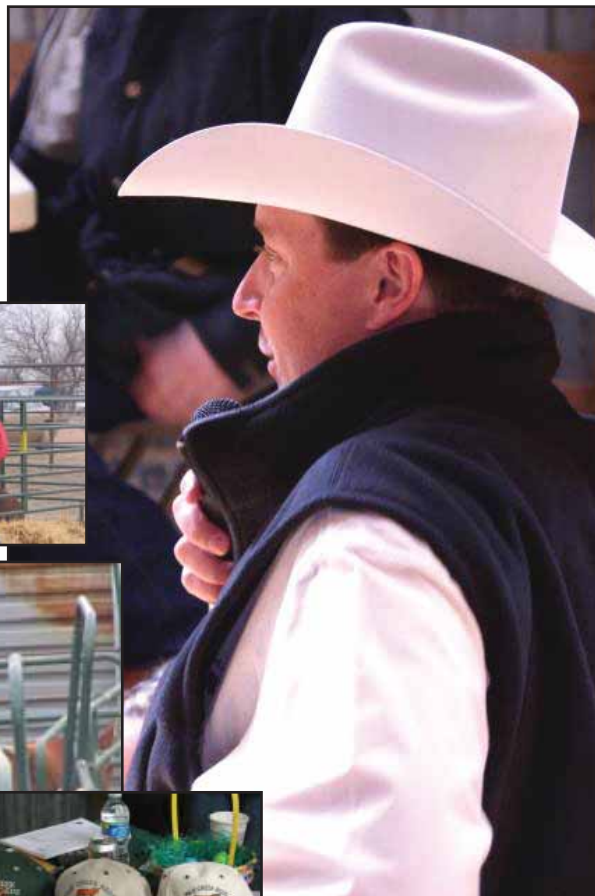

# BULL INFORMATION

are in a 20 acre pasture to ensure adequate exercise. They have been developed at Bruce Bowman's feedlot which is located 1 mile south of Rhame, ND.

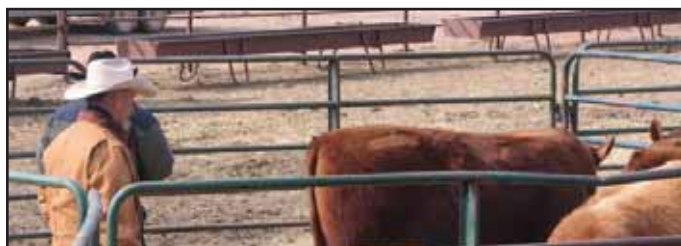

## SEMEN INTERESTS:

Milk Creek Reds is retaining one-half revenue sharing semen interest in all bulls in this sale. The retained semen interest by Milk Creek Reds allows us to collect semen, use semen on the bull in our herd, as well as share in semen revenue if the bull would develop interest to be used in other herds or semen marketing companies. Any semen collection would be at the buyer's convenience in the off-season use. Full possession and full salvage value sells on all bulls in this sale.

0112 is a dark red long made Lt 142 son that shows more muscle expression than you would expect out of a -4 birth weight epd. His dam and he made an impressive pair all summer long. His dam raised the 8171 Epic son that went to Select Sires in our 2009 sale. If you want a heifer bull that will perform above what his numbers show and leave you with excellent replacement heifers I would choose 0112.

Sheba 333 brought in another stout bull calf that has continued to grow with one of the better gain ratios. 333 is a nice uddered, dark red Chateau daughter that has one of our higher MPPA's in her sire group. This dark red Lt 142 son is thick and deep with good length. I think you will be able to pick him out in the pen.

0120 is a bull that combines a lot of great maternal genetics which have produced great cows but he has the look of a powerful bull. He is deep and thick with a very moderate frame. His dam is a easy fleshing nice uddered Epic daughter that goes back to the Lakota 850 cow. Her full brother was the high selling bull in the 2008 sale to Derrick Dukart of ND.

\*Pictured on inside front cover

0131 is our highest gaining bull in the offering. He offers a lot of performance in a larger frame package with good length and depth. His pedigree includes some of our best cows over the years, with the Lakota 112, Lakota 850 and the Sheba 403. These cows all offer above average performance with great phenotype as well as great udders and feet.
